Advanced cybersecurity Awareness ecosystem for SMEs

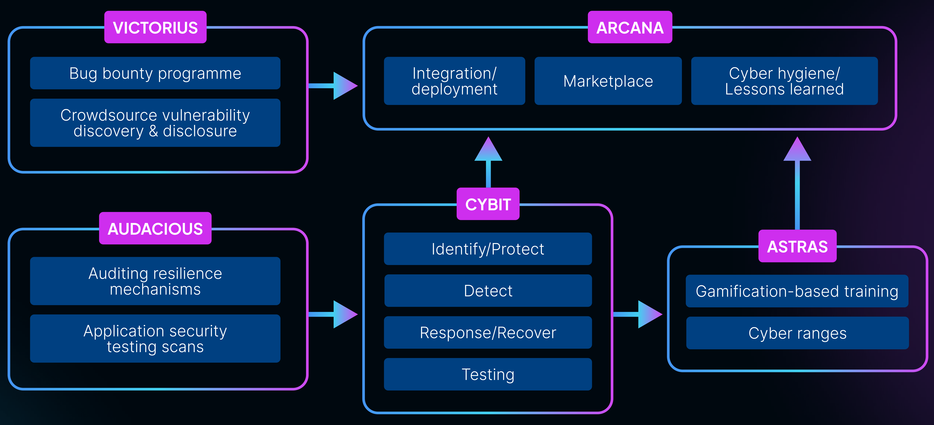
What is NERO

NERO is an advanced Cybersecurity Ecosystem designed to address the distinct aspects of awareness, training, and education in cybersecurity. NERO not only provides tools and resources but also focuses on cultivating a culture of cybersecurity awareness and resilience among organisations and individuals.

NERO Objectives

- Educate and develop a security-first culture among employees.
- Mitigate the impact of cyber threats through activities, resources, and training.
- Provide SMEs with a Cyber Immunity Toolkit Repository, Cyber Resilience Program, and Cyber Awareness Training via Gamification.
- Support cybersecurity awareness campaigns and focus on emerging cybersecurity threats.

5 NIST-based and interrelated frameworks to foster a cyber security culture



Target User Roles

Educators · Trainers · Researchers · Developers · Specialists · Auditors

3 Use cases

Healthcare

Enhancing Patient Data Security in Healthcare through Cybersecurity Tools

Transportation & Logistics

Strengthening Supply Chain Resilience through Cybersecurity Awareness in the Transportation and Logistics Industry

Financial

Boosting Financial Security through Enhanced Cybersecurity Awareness and Tools
