Cybersecurity Training Session in Pisa

16 May 2025

11:30-13:30 CEST

Training

Scenario-Based Cybersecurity Training

Learners step through a number of realistic cybersecurity scenarios from the perspective of SMEs in the healthcare, finance and logistics sectors

Advanced Network Monitoring using MMT

This training provides an in-depth exploration of Montimage Monitoring Tool (MMT) for advanced network traffic analysis and security monitoring.

Network Security Essentials

Network Security Essentials for SMEs is designed to equip small and medium-sized enterprises (SMEs) with fundamental cybersecurity knowledge and hands-on skills to protect their networks.

Important Info

16 May 2025 11:30–13:30 CEST

Location

Centro Congressuale M.A.C.C at la Camera di Commercio in Pisa, Italy

What to bring

Participants are required to **bring laptop, tablet or smartphone** in order to fully benefit from the hands on session.

Note that the session will be held in **English** and that **registration is free but mandatory**

Why You Should Join

Learn from cybersecurity experts from all over Europe and build your network

Gain hands-on experience on three different cybersecurity tools free of charge guided by our team of experts

Learn how to identify cyber threats and how to **implement security measures** with practical exercises on real world scenarios
